

### April 2018 Hampshire

Hampshire’s Marsh Plant Hire has purchased five new mobile cranes for its fleet from Liebherr

Marsh Plant’s new Liebherrs are three LTM 1040-2.1 (40-tonne) all terrains and two LTM 1060-3.1, which are 60-tonne class. All models have been specified with Liebherr’s Variobase system, which allows for asymmetric set-up of outriggers.

Marsh Plant managing director Andy Honeywell said: “We are proud to continue our long-standing relationship with Liebherr and continue to be impressed by the product specification and aftersales support they provided. We are considering further Liebherr orders for the second half of 2018.”

### The Construction Industry Research & Information Association

(CIRIA) has produced new guidance to help with the construction and design of sustainable drainage systems.

CIRIA’s latest publication, *Guidance on the construction of SuDS (C768)*, aims to support those designing, specifying and constructing sustainable drainage systems (SuDS) by helping them to understand and avoid common pitfalls.

The guide is a companion publication to CIRIA’s *SuDS Manual (C753)*, published in 2015, and provides advice, diagrams, case studies, checklists and photographs to illustrate challenges faced on site and ways of overcoming them.

**Silverstone**

Shaylor at the Races Shaylor has won a

Shaylor at the Races Shaylor has won a £15.5m contract to build a motor sports museum at Silverstone in Northamptonshire.

The new Silverstone Heritage Experience project, at the home of the British Grand Prix, consists of refurbishing an existing World War II hangar and building a new large extension. Fit-out works are being procured separately. The £20m project is supported by a £9.1m Heritage Lottery Fund grant and is scheduled to open in 2019.

**Plymouth**

City College Plymouth Stem Centre Plymouth needs additional capacity to meet the economic and labour market demands for STEM. To achieve this, a future-proof, fit for purpose facility is required. City College Plymouth is building this facility at a total cost of £12.83m. The project is designed to: meet identified future labour market needs; make significant GVA and private sector employment contributions to the City and address skills gaps that will create a considerable number of sustainable private sector jobs from the local labour pool. These skills gaps identified include; in-work progression, up-skilling the local populations and supporting young people into sustainable STEM careers.

**Outputs : 4,632 sqm**

**New build training/learning floorspace (new STEM, Creative and Digital Media and Marine Engineering Centre by the end of September 2017)**

**675 sqm Refurbished training/learning facilities (accommodation at Kings Road by September 2017 to accommodate learners displaced from the Goschen Centre)  
 420 new learners**

**Disneyland Paris**

Disney are planning a €2bn (£1.75bn) expansion of Disneyland Paris. The multi-year project will transform Walt Disney Studios Park and see the addition of three new areas based on Marvel, Frozen and Star Wars, along with other new attractions. The multi-year development will roll out in phases beginning in 2021, with a significant expansion of the Walt Disney Studios Park. In addition to the three new areas, the plan includes a new lake, which will be the focal point for entertainment and will also connect each of the new park areas.
